Technical Services Engineer (Satellite Repair)

The successful candidate will undergo training in shop and Rolls Royce to achieve delegated design authority from Rolls Royce as Competent Author of technical documents.

Responsibilities

- Evaluate the engine components for feasibility of repair in accordance with the approved procedures.
- Author technical documents to restore serviceability of service-run Rolls-Royce engine components, in accordance with the scope of delegated design authority from Rolls Royce.
- Ensure timely turnaround of technical documents to support engine overhaul requirements.

Requirements

- Degree in Mechanical or Aerospace Engineering (Candidates possessing both Diploma certification and relevant experience will be considered).
- At least 3 years of technical experience in an engine or component repair shop. Prior repair development or repair document authoring experience is an added advantage.
- Good knowledge of component repair processes (eg. Welding, Machining, Thermal Spray, Paint, NDT, Cleaning)
- Familiarity with Rolls-Royce and EASA procedures on Technical Variances and other Repair documents are preferred.
- Proficient in Microsoft applications.
- Meticulous team player with good communication skills.
